December 21, 2016

Contents

1 Getting started with Datary Python SDK lib **3**
- 1.1 Introduction . . . 3
- 1.2 Init Datary . . . 3
- 1.3 Repository Methods . . . 3

2 Datary Api methods supported in SDK **5**
- 2.1 Introduction . . . 5
- 2.2 Datary Main Class . . . 5
- 2.3 Datary Auxiliary Class & Methods . . . 5

3 Indices and tables **7**

Contents:

CHAPTER 1

Getting started with Datary Python SDK lib

1.1 Introduction

This section will show good practices and a guide to actions that can be done with this Datary lib SDK

1.2 Init Datary

1.2.1 Init using username & password

```
from datary import Datary
d = Datary(username='test_user', password='test_password')
```

1.2.2 Init using user token

```
from datary import Datary
d = Datary(token='test_token')
```

1.3 Repository Methods

1.3.1 Create repo

```
from datary import Datary
d = Datary(username='test_user', password='test_password')
d.create_repo(repo_name='repo_test',
              repo_category='datary_repo_category',   # other as default
              description='repo description test',    # repo_name description as default
              visibility='datary_visibility_option', # commercial as default
              license='license_test'                  # propietary as default
             )
```

CHAPTER 2

Datary Api methods supported in SDK

2.1 Introduction

This section is going to show the methods implemented in the lib to use Datary Api.

2.2 Datary Main Class

2.3 Datary Auxiliary Class & Methods

CHAPTER 3
